

# It is the last day of the Stockholm Water Week

... new ideas, new technologies, exhilarating insights, many many sessions...

Can you stand yet another sit down session or is it time to chill out?

**But then this is different:**

# What is the hole in your bucket?

***What is the leaky point which constantly saps your resources?***

***What is the leak which stands between success and failure?***

***What is needed to fix the hole? Why isn't it happening?***

***Who should do it? Which tools are needed?***

The Women for Water Partnership invites all Water Friends to an interactive session to send off the Water Week with a BANG... Share with us your "hole in the bucket" and bucket fixing strategies on:

**17 August 13.30 - 17.00 hrs**  
**Folkets Hus, room 204**

**Equal opportunities in Integrated Water and Resources Management (IWRM) and Water Sanitation (WatSan) through functional networking:  
From principles to practices**
